To whom it may concern

I am very concerned about the proposed development of the waste transfer station on 109A Church Street in Lidcombe. My objections to the development are based on the considerations listed below.

Lidcombe is developing into a very high density residential suburb, particularly near the train station area. The development of this waste transfer station will certainly have the following impacts on a large proportions of the population of the area:

1. Air pollution that generates fumes and bad smells to a high level of population due to its high density of residents living in Lidcombe
2. Traffic congestion to the already busy and narrow streets of Lidcombe as a whole.
3. High frequency of trucks carrying waste travelling the suburb result in drops and dribblings left along the roads and streets across the suburb is a severe threat to the health and safety of residents living in this highly populated area.
4. It will have very negative impacts on the property value of this fast growing suburb.

I can be contacted on the phone number listed below if you have any questions regarding this submission.

Yours sincerely
