Hi

My name is . I am the resident in I
am writing this letter to express my objection to the subject proposed development,

the site 109A Church St Lidcombe is located in the high population density area, and it is very close to the local residential , schools, aged care, park and businesses, the construction and operation of the organic waste transfer station will have significant negative impact on the neighbourhood.

Firstly it will bring traffic congestion to local area due to much more big garbage trucks will pass the local district when the station starts operation, and it will bring road noises and may increase the risk of the traffic accident as many streets in local area is the narrow street,

secondly it will negatively impact the health of local residents, there are a lot high level apartments around the site which will cause the smell of the waste cannot be dissipated, and negatively impact the well-being of local residents in the long term.

I strongly recommend the waste transfer station will be built in another location then it will not have bad impact on local residents and the surrounding environment.

Kind regards
