Dear Cumberland Council,

[REDACTED] I am writing to express my deep concern and opposition to the proposed plan for building a rubbish tip in our community. Our community has always prided itself on its peaceful environment, clean air, and natural beauty. Introducing a rubbish tip into our vicinity would not only destroy the aesthetics of our area but also pose serious health and environmental hazards for all residents, including children, families, and the elderly.

I would like to highlight several key reasons why constructing a rubbish dump in our area is not in the best interest of the community:

Environmental impact: : Pollution of our air, water, and soil, contamination of our natural resources and disruption of the delicate ecological balance can all be consequences of a rubbish dump.

Health risks: Its presence also carries significant health risks, such as dangerous emissions of gases and toxins that can cause respiratory issues, skin irritations, and other illnesses. Moreover, not only can the foul smell and a surge in rodent population have a negative effect on our lives, but it can be a sign that the delicate balance of our environment is being irreversibly altered.

Thank you for considering our objections and taking the time to review this matter. I trust that the council will act in the best interest of the community and make a decision that reflects the concerns and aspirations of its residents.
