

Re: APPLICATION NO: DA2023/1030

I have been a resident of Lidcombe for 70 years and I can not believe that an Organic Waste Transfer Station has been proposed to be built in Lidcombe Church Street.

It will bring toxic fumes from the rotting vegetable matter as well as the nappies, sanitary napkins and incontinences pads. This is not good for our health being so close to residence. It will also bring lots of vermin. Destroying our local environment as well as the eye sore and smells the train commuters will encounter travelling pass Lidcombe every day.

There is also a concern with the amount of large trucks that will be using our roads to dispose of the rubbish.

Do not allow them to build this.
