Objection to DA2023/0130, Site: 109A Church Street Lidcombe NSW 2141; Lot 1 DP778492

To the council,

I would like to kindly refuse to the organic waste station being transferred to Lidcombe. I believe this is harmful to me and my family's health as I am an elder with grandchildren. I am concerned for everyone else's health regarding the waste station.

First of all the people with weaker or developing systems like children and elderly will have a hard time adjusting as our systems are weaker than others. And the placement is in the center of Lidcombe, so it will drive away all the people as the smell is very bad. The smell might be worse for people in critical conditions like cancer or medical conditions. It is important to keep ourselves healthy to keep us going, and the waste station is not helping at all.

On the lines of health, the garbage is also bad for the environment, it gives us food and water and the smell is killing it with lots of harmful gasses. And once the trash kills all the plants, our dirt won't be able to put concrete for new roads and buildings because all the rubbish smells have gone into the ground and made it too soft for concrete.

Please take this into consideration and be mindful of other people in our society that need the help like me.

Your sincerely,
