To council,

I am writing to express my strong objection to the proposed development of the organic waste transfer station at 109A Church Street, Lidcombe, NW 2141; Lot 1 DP778492. I am deeply concerned about the potential negative impacts this project could have on the local community and the environment.

The establishment of an organic waste transfer station at the proposed location could have severe environmental consequences. Organic waste has the potential to emit unpleasant odors, attract pests, and contaminate soil and groundwater if not managed properly. Given the proximity to residential areas and natural habitats, these impacts could be detrimental to the local ecosystem and residents' quality of life.

The increased traffic would not only disrupt the tranquility of the residential neighborhood but also pose a threat to the safety of residents, especially children, who frequently use the streets for recreational activities. It is crucial to consider the potential accidents and hazards that may arise from the movement of large vehicles in close proximity to schools, parks, and residential areas.

I strongly believe that responsible urban planning and sustainable development should prioritize the welfare and interests of the residents. I trust that you will give due consideration to our objections and take appropriate action to address our concerns.

Sincerely
