Dear Cumberland Council,

I'm writing this email to you to express my OBJECTION about the proposed waste transfer station on 109A Church St Lidcombe, DA2023/0130.

Building a rubbish tip so close to residential homes will bring down the value of properties in Lidcombe and create more road congestion with the extra trucks that will be coming in and out of the rubbish tip. There's already a lot of traffic around Lidcombe as more apartments are being built. I've seen many impatient drivers around the area and increasing the number of trucks will only cause more congestion, more impatience and more accidents on the road.

A rubbish tip will also increase pollution around the area and have bad smells. It won't only affects me, it'll affect everyone in the suburb. There are many families in Lidcombe with young children. There are primary schools and childcare centres very close to the proposed site. Having extra pollution from the site and the trucks will affect the health of the children, the other residents and my health.

I am VERY AGAINST the rubbish tip built so close to my home. Please consider another place further away from residential homes.
