Subject: [EXTERNAL] Application No: DA2023/0130 - Proposed Organic Waste Transfer Station

CAUTION: This email originated from outside of the organisation. Do not click links or open attachments unless you recognise the sender and know the content is safe.

Hi Council

I wish to submit my concerns with regards to DA2023/0130 - Proposed Organic Waste Transfer Station.

Odour Control: This has the potential to negatively impact on the health and wellbeing of locals in residential areas (especially with it been located very close to R3 zoning) and within commercial entities of Lidcombe. GP services in Lidcombe are currently stretched and this could be further exacerbated with the potential health effects due to the introduction of this proposed organic waste transfer station.

Traffic Issues: This will create huge bottlenecks in traffic around Lidcombe particularly with the trucks taking back streets and also a safety hazard especially through the narrow tunnel by the viaduct.

Road infrastructure: In addition top the above point, road infrastructure will likely be damaged with increased truck usage of our local roads which are not designed for high volume traffic of trucks particularly as this transfer station will be used for councils across the Sydney metro area.

Hours of operations: The proposed hours of operations according to the EIS exceed that listed in the Council's Development Control Plan (DCP) for Industrial zone.

I request council reconsider the DA and take into account the overwhelming concern of the locals regarding this proposal.
