Dear Cumberland Council,

I am writing to strongly oppose the proposed development outlined in DA2023/0130, particularly the construction of an organic waste transfer plant. As a concerned resident who lives just 200 meters away from the proposed transfer plant, I urge you to carefully consider the following pressing concerns, specifically regarding the potential impact on my daily travel:

The proximity of the proposed development to my residence raises significant concerns about the disruption it will cause to my daily commute. Being just 200 meters away, the increased traffic, particularly from heavy trucks associated with the organic waste transfer plant, will severely impact my travel experience and significantly delay my daily routine.

Furthermore, the anticipated congestion resulting from the proposed development would inconvenience me and pose safety risks to all nearby residents. The strain on local infrastructure and potential gridlocks on nearby roads, including those I rely on for my daily travel, are alarming considerations that cannot be overlooked. Given these pressing concerns, I implore you to reconsider approving DA2023/0130. It is crucial to prioritise the well-being, safety, and quality of life of the affected community, including residents like myself, who will bear the immediate impact of this proposed development. A comprehensive assessment that carefully evaluates the potential disruption to my daily travel and addresses appropriate mitigation measures is paramount.

Thank you for your immediate attention to this urgent matter. You will thoroughly evaluate the proposed development's implications and act in our community's best interest. Taking into account the concerns raised by concerned residents like myself, especially the potential impact on my daily travel due to the proximity of the organic waste transfer plant, is essential.
