Dear Cumberland Council.

I hope this letter finds you well.

I am writing to express my strong opposition to the proposed construction and operation of an organic waste transfer station at 109A Church St, Lidcombe NSW 2141: Lot 1 DP 778492. File: DA2023/0130.

As a resident who deeply cares about the well-being of our neighbourhood, I believe it is crucial to voice my concerns regarding this proposal. First and foremost, the placement of an organic waste transfer station in close proximity to residential areas poses significant health and environmental risks. The accumulation of waste materials, odours, and potential leakage from the transfer station can result in an unsightly and unsanitary environment. These conditions may attract vermin, insects, and unpleasant odours that can negatively impact the quality of life for residents.

Furthermore, the proposed transfer station has the potential to decrease property values in the surrounding area. Residents, including myself, have invested their hard-earned resources to create a safe and pleasant living environment for their families. The presence of this site can create a negative perception of the neighbourhood and deter prospective homebuyers, leading to financial losses for homeowners.

Moreover, the increased traffic and noise associated with the collection and disposal of waste materials can disrupt the tranquillity of our community. Our neighbourhood has always prided itself on its peaceful atmosphere, and the introduction of a dumpster site would greatly compromise this cherished characteristic.

Instead of locating a transfer station within our community, I urge the council to consider alternative solutions that prioritize the well-being of residents. Investing in improved waste management practices, such as recycling programs and regular garbage collection, would be a more sustainable and community-friendly approach.

In conclusion, I kindly request that the council reconsiders the proposal to have an organic waste transfer station in our community. The potential negative impact on our health, environment, and property values is of great concern to residents like myself. I implore you to explore alternative solutions that align with our shared vision of a vibrant, safe, and harmonious neighbourhood.

Thank you for your time and consideration. I trust that you will carefully review the concerns raised by the community members and make a decision that truly reflects the best interests of our neighbourhood.
