Dear Council Member,

I am writing to you in regards to the proposed Organic Waste Transfer Station to be built at 109A Church St LIDCOMBE NSW 2141; Lot 1 DP 778942.

It is for the following reasons that I so vehemently object to the transfer station.

The first reason as to why I object is that it would lead to an increase in noise pollution. With the potential numbers of heavy vehicles that are expected to visit the transfer station, we can expect that there will be more noise. Considering that the transfer station may operate in the early hours of the morning, it will surely cause an interruption for a great number of individuals.

As an individual who is getting on in years, my main concern is the potential health risks it poses. Not only due to the fumes that it may produce in dealing with the waste but also the fact that it will attract more vermin and other scavengers. The transfer station would surely attract any unwanted pests as it would be easy target for any opportunistic scavengers. Vermin like rats also can carry diseases.

I thank you for your time and I hope this email helps you in your decision making.

Yours Sincerely,
