Dear Cumberland Council,

I would like to make an appeal against the development of the proposed organic waste station DA2023/0130.

The organic waste station will increase the noise and traffic around the area, in particular with heavy vehicles daily during construction and once established. There will be foul/unpleasant odours released to the surrounding radius. As a result of the above, the property values in the area will ultimately drop.

I am nearing completion of my knock down and rebuild in Berala. It has been a long two year build with countless delays. It will be disappointing to see my brand new home lose value due to the development of this waste station. I purchased and built a new home in this area as I would like to raise my family here.

Please acknowledge the concerns of the community and put a stop to this.

Kind regards,
