Objection to Waste transfer station
Church St Lidcombe

1. The proposed site of this Waste Transfer Station is within 70metres of the residential area. It should not be built within ANY residential area. But to be built within 70meters of existing residences, is ridiculous.
2. Traffic. With over 150 trucks per day quoted, Church Street and surrounding area will be unmanageable. Hundreds of units have recently been built along Church Street. When these units become occupied, the existing traffic, plus the traffic from the units, plus the 100 plus trucks would cause major disruption. That will have outstanding stress, noise, pollution. Not only in Lidcombe, but all the surrounding suburbs.
3. The Waste Station would be within roughly 600metres from the Lidcombe town centre. Schools, Daycare, Nursing homes, Outdoor areas, Parks. The impact to this community, it would never be the same again.
4. Respect...The largest cemetery in the southern hemisphere Rookwood, is only a few hundred meters from the above site. We ask for some respect.
5. It would be the view of the majority that this Waste Transfer Station does not proceed

Thank You
