To whomever it may concern,

My name is _____ . I have been made aware of a proposed rubbish tip (Organic Waste Transfer Station, 109A Church Street, Lidcombe) and have serious concerns about the following:

- Constant daily movement of trucks coming through Lidcombe increasing the amount of substantial traffic that already exists.
- The timing of these movements as the timeframe doesn't align with the Environmental Impact Statement (EIS)
- The increased amount of rubbish that will come out while in transit. While trucks are indicated to be covered, the reality is that they are not always covered.
- The hours of operation: the Cumberland Development Control Plan (DCP) for Industrial zone says that timeframes are 7.00 am to 6.00 pm Monday to Saturday (nothing on Sunday). The proposed operational times go significantly over the DCP.
- The odour that will be coming into Lidcombe from this - whilst the EIS and other reports allegedly address the odour, there is no assurance that odour from the cost can be minimised. This will significantly impact the commercial and residential areas of Lidcombe.
- This site is not suitable for waste transfer processing – it needs to be within a full industrial area, with major arterial roads, not town centre or suburban roads, and not within such reach of a major residential area.

Please feel free to contact me via email for more information.

Cheers
