[REDACTED] and I have been living in Lidcombe for over 35 years. I have recently come to know that there is a proposed waste station to be built in the heart of Lidcombe where there is a high usage of church st to connect to otherside of lidcombe and king georges road or flemmington straithfield etc otherwise residents are left to use busy parramatta road which is overly busy any given time of the day anyway . Traffic will be at stand still longer than expected as both john st and church st are the main connectrs to all other surrounding locations in the area. This waste station will see an increase in health risk to not only the old and new borns but all residents in the area - there are plenty of new young families settling in the area who now see lidcombe as home - it is hard to get to the station and otherside as it is now however this will only get worse with increase traffic flow and polution - many residents lives are at risk due to unnessary pollution and trafic increase there are 2 primary schools and station rush daily already, and with the 118 trucks and other moving traffic Lidcombe residents health and safty is under danger and at high risk.

Cumberland Council and residents should not be the dumping ground for parramatta council !!! its time cumberland council stood up for its residents and move toward enviromentally freindly suburb where its hygenically safe clean and crime free . Stop the noise and smell and do not put Lidcombe residents health and safty at Risk cumberland council.
