Opposition against DA2023/0130 Organic Waste Transfer Plant at 109A Church Street, Lidcombe:

We oppose the organic waste transfer plant at 109A Church Street, Lidcombe due to the negative impact it would have on local traffic in Auburn and Lidcombe. Reasons include:

Traffic Congestion: Adding truck traffic to already congested areas would worsen traffic conditions, leading to longer commute times and frustration for residents and commuters.

Safety Risks: Increased truck activity raises safety concerns for pedestrians, cyclists, and drivers, increasing the risks of accidents, particularly at intersections and narrow roadways.

Emergency Access: The plant could impede emergency vehicle access during peak traffic hours, compromising public safety and response times.

Disruption to Local Businesses: Traffic congestion may deter potential customers from accessing local businesses, resulting in economic losses.

Alternative Traffic Solutions: Exploring infrastructure improvements and alternative transportation options can alleviate congestion and improve traffic flow.

In summary, the proposed organic waste transfer plant would negatively impact local traffic in Auburn and Lidcombe, leading to congestion, safety risks, and disruptions to businesses. Alternative solutions should be considered to minimize these adverse effects.
