To whom it may concern,

Reasons for objection come to mind straight away are health related. According to several studies looking at those living in proximity of a landfill shows that anyone within 5 km are at higher risk for respiratory diseases. This is even more prominent in children and there are schools within 5 kilometers of the proposed site. I will no longer be able to open my windows for fresh air as it will be more hazardous than my indoor air quality.

Additionally, as a homeowner in the area I know that our housing values will be impacted by being within close proximity to a landfill as the distance will not be enough to keep the smell away. Considering the substantial cost of housing, this is just a slap in the face to us local homeowners. On top of that, the increase in traffic and noise from waste trucks constantly dropping off waste will be significant, further eroding values of our homes.
