Re: DA2023/0130, Site: 109A Church Street LIDCOMBE NSW 2141; Lot 1 DP 778492

Dear Sir/Madam and Fay

I write to strongly object to the above development application for the following reasons:

1. Odours and pests - Organic material and waste will spread odours and attract pests such as rodents and insects. I am particularly concerned as it is within a close proximity to residents, businesses (including restaurants) and schools/childcare centres
2. Traffic congestion - Church St only has a single lane in each direction. The development would increase number of large trucks in the area during construction phase as well as when the organic waste transfer station is operational, and also block an important traffic corridor out of Lidcombe
3. Noise and air pollution - An organic waste transfer station would increase noise and air pollution during the construction phase and subsequent operations.

I therefore consider that the proposal is contrary to the interests of residents of Lidcombe and request that the development application is refused.

Yours sincerely
