To whom it may concern,

I, () express concerns on a development proposal DA2023/0130. The project would demolish existing buildings to build and operate an organic waste station on 109A Church St, Lidcombe just around the corner from our residence. We have built our house over 20 years and come to love this suburb we call home. However, we have received news about this project and have major concerns about it.

If this project goes ahead there will be major impacts such as heavy traffic as a multitude of trucks will be going in and out, increased traffic times on an already congested road as is. The road damage due to these trucks are also of concern as we already have quite a few logistic companies nearby with many big trucks using these smaller roads and in addition to this waste operation and its magnitude of over 100 truck movements on the daily will be detrimental to the quality of our roads as well as our safety to use them.

The pollution is another concern as if this does go ahead rubbish from multiple areas through over 100 truck movements daily as well as the constant need for maintenance and possible rubbish leakage would occur that would destroy the current living environment. We have air pollutant from the exhausts and fumes from the truck as well as other waste related fumes which could decrease the air quality overall in the area. I find this project personally affecting my family as I have a daughter who has asthma and additional pollutants in the area due to a new waste station right around the corner makes me really worried about her future health and our fellow neighbours who could have other conditions which could deteriorate due to these pollutants if this project was to go ahead.

Kind regards,
