Subject: [EXTERNAL] [OBJECTION] APPLICATION NO: DA2023/0130

CAUTION: This email originated from outside of the organisation. Do not click links or open attachments unless you recognise the sender and know the content is safe.

Dear Council member,

Please consider this a letter of objection to Application No: DA2023/0130 to create an organic waste disposal site at 109A Church Street Lidcombe.

I'm the owner of Address: _____ and the waste centre will cause significant issues around the area, especially the odour control during the summer time, introduction of insects and cockroaches, and other matters of concerns listed below.

I echo the concerns that's also been raised by _____ but I'm particularly concerned about Odour control and introduction of pests. This will increase our maintenance costs for pest control and also impact the health and well being of residents that are very close to the waste site. The traffic and increase of rubbish dropped by the rubbish trucks will significantly damage the image of properties that are close by to the waste centre and lower the value of my property.

Smelling odours from my balcony during summer is not something I'd be looking forward to. Would you? Bare in mind that the council has approved and had developers develop the land on between the railways and church street that directly faces the 109A Church Street Lidcombe site.

Most of these residents that has bought the property would not even have a chance to reject the submission DA2023/0130. The home values will significantly decrease and the winner being only the property developer. As the council you need to look after your residents in the area. This TIP should go much further away from residential areas.

Traffic issues

- 118 truck movements daily – through town and/or residential areas;
- Timing of these movements – timeframes don't align within the Environmental Impact Statement (EIS), so more detail, corrected, should be provided.
- This transfer station will be used for councils across the Sydney metropolitan area (listed as Inner West and Central Sydney areas, and then further implied for waste transfer across the Sydney metropolitan area), so transport and waste would be from all angles across the Lidcombe road network.

Quality of road network

- Roads and roundabouts will be damaged by the ongoing heavy vehicle usage of the area.
- Maintenance would then be needed, which Council would need to pursue.
- Rubbish on trucks could also 'fly out' during the transport phase. While trucks are indicated to be covered, the reality is that they are not always covered.

Hours of operation

- From EIS – Monday to Friday – 6.00 am to 10.00 pm; Saturday – 8.00 am to 6.00 pm; No operations will take place on Sunday and public holidays
- Noting that the timeframes may expand pending other requirements of the business need.
- Note that the Cumberland Development Control Plan (DCP) for Industrial zone says that timeframes are 7.00 am to 6.00 pm Monday to Saturday (nothing on Sunday). The proposed operational times go significantly over the DCP.

Odour control

- Whilst the Environmental Impact Statement and other report allegedly addresses the odour, there is no absolute assurance that odour from the site can be controlled.
- Odours will also buffer the area when the trucks are travelling through to the site.
- This will then impact the commercial entities of Lidcombe, as well as the residential areas.

Location

- Whilst this is an area zoned 'industrial', however, it is within very close proximity – less than 100 metres to the residential area.
- Significant public housing, affordable housing and units are almost completed construction in very close proximity. It is so inappropriate for this proposal to be within this proximity.
- The DCP also indicates 'The hours of operation are managed to ensure residential amenity is protected' (item 2.12 – Operational Management). This proposed operation completely unprotects the residential amenity.
- Extracts from the amenity of the public space open area of the Pippita Rail Trail which is intended for active use and improved access to parklands and open spaces.
- This site is not suitable for waste transfer processing – it needs to be within a full industrial area, with major arterial roads, not town centre or suburban roads, and not within such reach of a major residential area.

Potential Future Tip Operations

- If it is approved, is it Cumberland City Council to monitor the operations of this business? How will they do this? It adds more strain on the Council
- What penalties will Cumberland City Council impose on the operator re going outside the approved operations?
- If the 'Tip' becomes operational, what if it is extended to become a 'tip' for everything (garbage, recycling, green waste, FOGO and building waste (including asbestos). How will Cumberland City Council monitor the potential expansion of this 'tip'? This is 'futuristic', but could be of concern.

Regards.
