**Reason for objection:**

Why doesn't the council work for the residents of Lidcombe?

Mid to high rise residential buildings have now been increasing and will continue to be built in the Lidcombe. As a result, general household population will continue to increase rapidly in the future.

Even though the council's finances have increased due to the increase in residents, the council's attempt to build facilities against the interests of residents in Lidcombe.

This is the proof that the council does not work for the residents.

Currently, the traffic congestion of this area is getting worse due to the increase in the inflow population.

In addition, due to the huge area of Lockwood Cemetery, there is impossible to be developed in the future for any of the community benefits.

The current public/urban infrastructure of the area does not reflect that growth.

For example, there is no public high school and Lidcombe library is very old and poorly maintained, there is no good quality playground facilities for children.

Hence, introducing a waste transfer station will significantly lower the property values of the area and discourage the growth of the community in the future,

as Lidcombe is already lacking public resources as mentioned above.

Proposing such facility in Lidcombe, which has close proximity to the station and residential area is NOT suitable as it will have a huge impact on its current and future residents and the wider community.

Therefore I strongly object to this proposal, and request the council to consider other suburbs that will have minimal impact to local residents.

How can we trust a council to against the interests of residents?

Kind regards,
