Dear Cumberland council staff,

This is Teresa, I am one of the resident reside in Lidcombe, in which the suburb may be proposing a Development of organic waste transfer station that is right next to and surround by the high residency area.

The operating time for this proposing company is from 6am-10pm, which is a very extend working hour, despite the amount of noises created by the trucks and the fact is it will bring into this quite neighbourhood, where family enjoy spending time out in the parks and the surrounding entertainment services.

The large trucks are operating to carry large amount of "organic products", as the average truck can weights up to 20 tones , with a full truck it may contain up to 40 tones per truck. This increasing amount of trucks coming in and out the residency area can highly increase the risk of road damage and higher chances of car accidents due to heavy trafficking, trucks constantly occupying the roads etc.

Here are just some of my opinions regarding to the proposing Development. If you can kindly hear us out and we also appreciate your time.
