Dear Cumberland Council,

With great disappointment - I am writing this letter to express my concern and objection to the proposed construction of a new rubbish tip building in Lidcombe.

The increased truck movements, as outlined in the proposal, would undeniably result in heightened traffic congestion, noise pollution, and safety hazards on our local roads.

The transportation of waste materials through residential and commercial areas poses substantial risks to pedestrians, cyclists, and motorists alike. The presence of large, heavy trucks navigating through our community not only disrupts the flow of traffic but also compromises the safety of vulnerable road users!

Our existing road infrastructure may already be strained, and the additional truck movements associated with the rubbish tip building would exacerbate the problem.

In light of these traffic-related concerns, I strongly urge the council to reconsider the proposed construction of the rubbish tip building in our community.

It is essential that alternative waste management solutions are explored.

I trust that the council will give careful consideration to the concerns expressed by myself and fellow community members regarding the proposed rubbish tip building.

Thank you for your attention to this matter.

Best Regards,
