Dear Sir/Madam,

I am writing regarding the DA Approval at Property 109A Church Street LIDCOMBE NSW 2141.

We want to know:

1. We are concerned about the smell pollution and traffic congestions from this Organic Waste Transfer Station. What processes does the Council have in place?
2. How are the organic wastes processed in this plant?
3. What toxic fumes or gases may this plant emit into our surroundings?
4. How your Council will be managing this plant so that we can live peacefully and with no annoyances from this plant operations?
5. What reports are available from the Council about this plant's smell pollution? How much is considered ok and not ok according to your policies? If it evens smells slightly, will Council take any actions? What are those actions that Council will take? Please elaborate.
6. How can we the residents measure or collect this information about the smell pollution?
7. To which authorities, should we lodge a complaint about this plant's operations?

Please ensure that you provide elaborate and detailed responses to each of my questions so that it is clear and avoid misunderstanding/confusion.

If not, it will be further escalated to the Mayor, Minister/s and media.

Thank you for your time and consideration.

Regards
