Dear Cumberland Council,

I am writing to express my strong and unwavering opposition to the proposed organic waste station and waste tip in Lidcombe. I adamantly believe that these projects pose severe risks to our beloved neighbourhood and must be reconsidered. I urge you to prioritize the well-being of Lidcombe and its residents by exploring alternative solutions that protect our community from the potential harms associated with these facilities.

An organic waste station situated near residential areas would emit foul odors and attract pests, significantly impacting our quality of life. Moreover, the inadequate management of waste could lead to contamination of soil, water, and air, jeopardizing the health of both humans and local wildlife. Furthermore, the presence of such facilities may have detrimental effects on property values and deter potential investors, ultimately undermining the economic prospects of our neighbourhood .

I implore the council to listen to the resounding voice of the community and give due consideration to our concerns. It is crucial to conduct a thorough assessment, engage in transparent decision-making processes, and seek alternative locations that do not compromise the well-being and beauty of Lidcombe. Let us work together to preserve the charm and livability of our neighbourhood.

Thank you for your immediate attention to this matter. But with all seriousness get your act together I'm sure it would be more suitable in merrylands or other suburbs.

Yours sincerely,
